

Mostafa Hussein Mohamed

Backend PHP Laravel Developer

✉ mostafaaa.husseinn@gmail.com  Mostafa Hussein Mohamed  Mostafa Hussein

PROFILE

Dedicated and detail-oriented Backend Developer with expertise in PHP and Laravel. Proficient in building robust, scalable, and secure web applications, with hands-on experience in API development, database design, and implementing role-based access control. Adept at solving complex problems and optimizing application performance. Seeking a challenging role or internship to further enhance my skills and contribute to impactful projects.

EXPERIENCES

E-Commerce

Developed a complete e-commerce system using Laravel and MySQL, integrating Stripe for secure payments. The platform includes product management, shopping cart, checkout, order tracking, and an admin dashboard for managing users, orders, and inventory.

Point of sale

Developed a robust POS system using Laravel 10 and MySQL, enabling shop owners and businesses to efficiently manage product pricing and sales operations. The system includes essential features such as transaction tracking, and inventory management. Integrated authentication using Laravel's built-in system for secure access. The project is designed for scalability and future enhancements.

Restaurant API – Laravel & Stripe Integration

Developed a Restaurant API using Laravel 11, implementing the Service Repository Pattern for clean, maintainable, and scalable code architecture. The API facilitates order management and table reservations, with Stripe integration for seamless online payments. Secure authentication is handled using JWT, and role-based access control (RBAC) ensures proper user permissions.

School Management System

A comprehensive School Management System built with Laravel and Livewire, featuring a modern Webmin dashboard. It includes secure multi-auth for admins, teachers, students, and parents. The system manages grades, classes, sections, subjects, student accounts, and invoices. Teachers can upload exams and materials, while parents can track their children's academic performance.

FREELANCE PROJECTS

Elwessam Educational platform

Elwssam is a modern educational platform developed for "Nader Abedelfatah" a German language teacher to manage his online courses, students, and educational materials with ease. The platform is built using Laravel with a strong focus on security, performance, and scalability.
